

Volume of Right, Rectangular Prisms - Lesson Assist

Perimeter = Distance around a figure, could measure with a ruler so units are inches, feet, cm etc.

$$\text{Perimeter} = 3 + 4 + 5 = 12 \text{ cm}$$

Area = Space inside a 2-dimensional (flat) figure, measure with squares so units are in², ft², cm² etc.

$$\text{Area} = 3 \times 2 = 6 \text{ cm}^2$$

Volume = Space inside a 3-dimensional figure (prism), measure with cubes so units are in³, ft³, cm³ etc.

$$\text{Volume} = 18 \text{ cm}^3$$

(How did I get 18 ?)

Skills Assist

Multiply Fractions - multiply across tops and bottoms

$$\frac{1}{3} \times \frac{3}{5} = \frac{3}{15}$$

* answer can be simplified more

Multiply decimals - multiply as normal, then count

how many numbers are behind decimal places in those numbers. Use that many decimal places in your answer.

* There are **3** numbers behind decimals in problem so need **3** numbers behind in solution
